SUMMARY

Data Analyst with 2+ years of experience supporting business intelligence, analytics, and data-driven decision making in high-scale, operational environments. Strong expertise in SQL, Python, dashboard development, KPI tracking, and stakeholder-facing analytics. Adept at supporting fast-moving operations with ad-hoc reporting, data validation, and continuous reporting improvement.

PROFESSIONAL EXPERIENCE

Google

Hyderabad, India

Data Analyst Apprentice

June 2024 - Present

- Designed and executed product evaluation frameworks for **8+ U18 Google GenAI products** (Gemini Web-App, AI Overview, NotebookLM), transforming ambiguous product questions into measurable KPIs and actionable insights for cross-functional teams.
- Conducted large-scale behavioral analyses, including an **80M+ query log study** covering region trends, age-stratified patterns, linguistic segmentation, and user intent signals; insights influenced recommendations shared with leadership ahead of the US Product Summit 2025.
- Evaluated LLM model outputs using statistical techniques (confusion matrices, threshold tuning), enabling **70% reduction in manual review workload** by optimizing an Autorater configuration for safety-critical pipelines.
- Designed and maintained SQL-based reporting pipelines supporting large-scale operational and behavioral datasets (**50M+ DAU**), ensuring data accuracy and consistency.
- Built and maintained interactive dashboards for performance monitoring, anomaly detection, trend analysis, and operational insights used by product and engineering teams.
- Led a team of 3 apprentice on behavioral risk analysis initiatives, mapping outlier patterns and edge cases to strengthen detection frameworks and improve data quality for downstream analytics and reporting.

Feynn Labs

Machine Learning Intern

January 2024 - March 2024

- Conducted data analysis on **60,000+ EV** records across India using Python, Pandas, and SQL, deriving insights that shaped market strategies for startups.
- Built predictive models and exploratory dashboards to guide pricing, segment behavior, and flagship product positioning.
- Assisted in preparing clean, structured datasets for analytics consumption and reporting.

PROJECTS

- User Engagement Optimization (A/B Testing)** – Ran an experiment on a large web user dataset to compare a new feature vs the old version and measure its impact on click-through rate. The new design drove a massive 29.5 percent increase in engagement with statistically proven significance, supporting rollout for all users. [GitHub](#)
- GenAI Document Intelligence Platform (LLMOps + RAG)**, Built and deployed a RAG-powered LLMOps pipeline for enterprise document Q&A using LangChain, FAISS, and Google Gemini API, achieving 95% retrieval accuracy. Automated deployment and monitoring with GitHub Actions. [GitHub](#)

TECHNICAL SKILLS

Analytics & Data Tools: SQL, Python (pandas, numpy), KPI design, funnel analysis, cohort analysis, behavioral insights, dashboarding, A/B testing, Tableau, Power BI, Google Analytics, BigQuery, Sheets/Excel, GitHub

Data Engineering & Automation: Feature engineering, pipeline design, data validation, MLflow, Airflow (working knowledge)

Generative AI: LangChain, Hugging Face Transformers, RAG Pipelines, Vector Databases (FAISS, Pinecone)

Communication: Insight storytelling, structured writing, presenting to cross-functional stakeholders, documentation & SOP

EDUCATION

University of Mumbai

Bachelor of Engineering in Mechanical Engineering, CGPI-8.31

Mumbai, India

June 2023

CERTIFICATION

- Data Analytics For Business ([Intellipaat & IIT M](#))
- Google Data Analytics ([Coursera](#))

EXTRAS

- Recognized with **2 Peer Bonuses** at **Google** for contributions to internal product development and cross-team impact.
- **SAE Club** [VCET Solection](#) – Won 2 National Level Competitions: SEVC 2022 and ESVC'3000 2023.
